DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: a cardiac procedure

Species II: a procedure on a mediastinal organ other than the heart.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none are generic.

If invention I is elected, a further election of a sub-species is required, each corresponding to a surgical instrument:

Sub-species i: a stapler

Sub-species ii: an ablation device

Sub-species iii: a device for performing epicardial mapping

Sub-species iv: a device for performing interpericardial drug delivery

Sub-species v: a device for performing a myocardial biopsy

Sub-species vi: a needle for injecting cells for cellular cardiomyoplasty

Sub-species vii: a cannula for injecting cells pharmacological agents for angiogenesis

Sub-species viii: a robotic instrument for performing coronary bypass

Sub-species ix: an energy probe or mechanical element for transmyocardial revascularization

Sub-species x: a device for creating a pericardial window

Sub-species xi: a suture loop

Sub-species xii: a clip for sealing off the atrial appendage.

Applicant is required to further elect a single disclosed sub-species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. For example, "Species I, sub-species ii, wherein claims (?) are readable thereon." An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Alan W. Cannon on August 19, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
